# Press Release

## eBook Readers Compared

### eBook reader trends

Charlotte, NC, September 17, 2010: Did you recently put off answering for yourself the questions, "If there is an ebook reader out there that's just right for me, how will I find it? When will I have the time to do purchase research? Or, should I just buy the model my friend bought?" Have you already answered the question, "Are ebook titles growing as fast as the marketing and blog hype about the sales of ebook readers?"

The answers are not easy and could take a considerable amount of time. In the end, only you will be able to sort through the significant number of features offered by the many ebook reader manufacturers and find the right product for your eyes, your need for color, or your preferred reading locations.

Included below are several links that may shorten your search time considerably. Several side-by-side comparisons were selected that display as many as sixteen ranked brands and the published features of each listed in easy to read tables. Two comparisons rank the listed ebook readers and provide an all important guide for selecting the one best suited for your wants and needs.

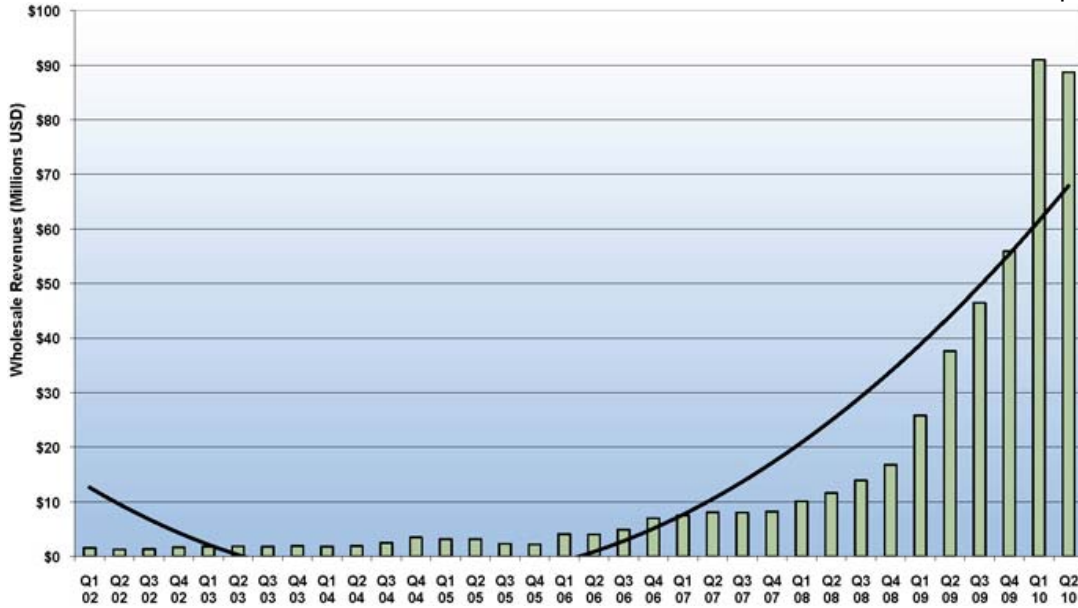

The growth in ebook titles in this decade is illustrated in the chart below created by The International Digital Publishing Forum. Note that the first two quarters of this year far exceed the sales totals for several of the preceding years. When readers find the titles they seek, they are buying.

International Digital Publishing Forum

**Q2 2010 = \$88.7 Million**

For Immediate Release.

*more*
